One connected Wistudi environment

What Wistudi solves

One platform to author, publish, distribute and deliver learning across digital, print and lower-connectivity environments.

Fragmentation removed

AI-assisted authoring

Create and customise Flows, XP Video and learning resources from one workflow.
Full AI-assisted authoring targeted for end of Oct 2026.

Connected tools

Bring activities, media, assessment and external EdTech blocks into one learning experience.

Publishing power

Educators and organisations can publish interactive, digital and printable learning content themselves.

Multi-format delivery

Interactive Flows, video experiences, documents and worksheets can come from the same source.

Social learning layer

Learning can continue through sharing, discussion, collaboration and community interaction.

Commercial relevance across segments

1.3B

school-age children
lack internet at home

UNICEF / ITU

~40%

primary schools
globally connected
to the internet

UNESCO GEM

\$52B+

estimated investment
for basic offline digital
access in lower-income
markets

Creators

Institutions

Partners

B2G pathway

This strengthens Wistudi across creator-led adoption, institutional deployments and partner-led distribution. In addition, it opens a B2G pathway where governments and development agencies are investing in connectivity, platforms, devices and learning resources.

This allows the platform to serve connected, lower-connectivity and future offline-capable learning environments.

One source

wider distribution

Wistudi

*From ideas
to impact.*

An interactive authoring & publishing platform.

Build once. Publish across multiple learning formats and distribution paths.

Author

Create rich digital learning experiences with modular blocks, interactive media, assessments and guided activities.

Publish

Turn the same content into interactive lessons, XP videos, printable learning and structured learning journeys.

Distribute

Share across self-paced, live, institutional and LMS-connected environments to reach learners in more ways.

Wistudi is the content creation and publishing layer that **complements learning systems** — not just another LMS.

*Connected learning.
Real outcomes.*

Education technology is powerful - but the learning experience is often fragmented.

Many tools support parts of teaching and learning. Wistudi brings creation, teaching, learning, assessment, publishing and connected workflows into one learning environment

Fragmented learning stack

One Connected

Modular Learning Built with Wistudi

Complete engaging lessons with modular activities. Intuitive to build.
Designed for educators. Complete learning experiences that work.

1

Choose

Pick from versatile activity blocks that support every learning goal.

2

Stack

Combine activities in a sequence that makes sense for learners. goal.

3

Build

bring your lessons to life with rich, interactive learning experiences.

4

Scale

Reuse, adapt and share lessons across classes and grade levels.

The power is not the individual block. It is what the blocks become together.

MULTIPLE CHOICE

QUESTION TEXT

What can you see inside the tent?

ANSWER OPTIONS

A A sleeping bag

B A medkit

C A map

D A flashlight

Watch. Learn. Interact. Complete

Wistudi turns videos into an active learning experience by embedding the same modular blocks into lessons, checkpoints and learner interactions.

-  **Watch**
Learners engage with guided video content
-  **Learn**
Concepts are delivered inside one lesson journey
-  **Interact**
Activities such as polls, true/false, written response, whiteboard and smart sorting appear at key moments.
-  **Complete**
Learners progress through a connected lesson experience.

One **active learning** layer across **video** and **lessons**.

From Screen to Desk

Build the learning experience once, then continue it on screen or on paper.

Interactive Learning

Teach, assign and engage through on-screen interactive activities

Printable learning

AI-assisted conversion and clever worksheet design transform the same lesson into a paper-and-pen experience.

BUILD

One lessons.

Two Connected experiences.

Not another LMS. Not just another activity tool.

Wistudi connects what educators create, how learners engage, and the systems institutions already use.

Traditional LMS

- Enrolment & administration
- User / cohort management
- Records & compliance
- Institutional structure

Canvas

Strong infrastructure, but not built around rich modular content creation.

Wistudi

Create

Teach

Assess

Publish

Connect

A modular learning environment built around the teaching and learning experience.

Specialist EdTech tools

- Interactive video
- Quiz & activity tools
- Presentation tools
- Specialist learning apps

Powerful specialist experiences, but often disconnected from the wider learning workflow.

Wistudi complements existing systems while **connecting the learning experience** end to end.

Support **built** by educators.

Teachers, trainers and classroom practitioners who support users online, on the ground and in real learning environments.

Hands-on product demos

Teachers supporting teachers

On the ground at events

Listening, guiding, responding

Available online and in person

What this support team brings

- ✓ Real classroom and training experience
- ✓ ESL, STEM and educator insight
- ✓ Client demos, walkthroughs and event support
- ✓ Fast feedback between users and product
- ✓ Visible, approachable and ready to help

Why it matters

Wistudi is not only built for educators — it is supported by educators.

Online or offline, the Wistudi team shows up **where learning happens.**

From product development to **market validation**

Wistudi is moving from a strong product foundation into real educator, partner and market activity.

Product live and expanding

Interactive lessons, XP Videos, modular activities and printable learning are taking shape as one connected platform.

Educator feedback loop

We're working closely with teachers, running workshops and using direct feedback to improve the product.

Institutional pilots and trials

Pilot conversations and early trials are helping us test the platform in real learning environments.

EdTech ecosystem forming

Wistudi is being built to connect with external tools, partners and LMS platforms through LTI.

SEA market validation

Early traction in Southeast Asia is helping shape Wistudi's first route to market and partnership growth.

Three routes to market. One connected growth engine.

Real
learning.
Real impact.
Together.

Wistudi reaches educators, institutions and learners through a multi-channel go-to-market strategy.

Creator-led adoption

Discover → Create → Share → Grow

Educators enter through free access, build and share learning experiences, and introduce Wistudi into their classes and communities.

- ✓ Free creator entry
- ✓ Workshops and communities
- ✓ Templates and shared content
- ✓ Organic learner exposure

Institutional adoption

Pilot → Validate → Expand

Wistudi works directly with schools and education organisations to test the platform in real environments and convert successful pilots into larger deployments.

- ✓ Institutional outreach
- ✓ Pilot and trial programmes
- ✓ Training and onboarding
- ✓ Organisation packages

Partner-led distribution

Integrate → Distribute → Scale

EdTech integrations and local partners help Wistudi reach institutions faster, particularly in markets where trusted local relationships matter.

- ✓ EdTech integrations (LTI)
- ✓ Distribution partners
- ✓ Referral and reseller channels
- ✓ Regional introductions

Free to enter.

Paid as usage and organisations grow.

A simple, scalable business model that aligns value with real usage.

More
learning.
Greater
possibilities.

1 Free creators

Start creating with low friction

- ✓ Sign up free
- ✓ Explore and create
- ✓ Starter credits

Get started. No credit card required.

2 Credit usage

Usage drives recurring value

- ✓ Credits used to publish
- ✓ Access premium features
- ✓ More usage as you create, teach and share

Create more. Do more.

3 Organisations

Larger shared credit pools

- ✓ Schools, training providers and organisations
- ✓ Unlimited users
- ✓ Central management
- ✓ Larger credit packages

Built for teams. Ready to scale.

4 Enterprise & partners

Higher-value deployments and ecosystem revenue

- ✓ Enterprise deployments
- ✓ Integrations and API/LTI
- ✓ Partner and distributor channels
- ✓ Custom arrangements

Greater impact. Together.

Wistudi is designed to scale through connected EdTech ecosystems.

Direct adoption validates the product. Partnerships and institutions accelerate distribution.

Wistudi combines a usage-based software model with a partner-led go-to-market strategy.

Educators can adopt Wistudi directly, but the primary route to scale is through EdTech integrations, institutional partnerships and distribution channels.

Partners integrate their technology into Wistudi to extend how their products can be used within broader learning experiences. In return, Wistudi gains new platform capabilities and potential access to established educator, learner and institutional networks.

This means growth does not depend solely on acquiring individual users one at a time. Each successful integration can strengthen the product while creating another route into schools, universities and education organisations.

Direct adoption

Product validation, creator growth, usage data and community feedback.

Partner-led distribution

Integrations expand Wistudi's capabilities and connect the platform with established EdTech audiences.

Institutional scale

Pilots and partner relationships create pathways into larger organisational deployments.

Early traction since launch — and the scale path ahead.

Current platform adoption provides early validation. Partner pilots and collaborations show the next stage of potential distribution and growth.

Current Wistudi users

Actual platform users since public launch on 15 Aug 2026.

Active users include frequent users. Registered users include all users.

Partner-led potential reach

Illustrative partner distribution milestones from Aug to Dec estimate.

Illustrative partner audience / institutional reach figures based on active pilots, signed collaborations and pipeline opportunities. These are not current Wistudi platform users.

Current users validate the product, while partner pilots expand the route to larger-scale growth.

Multiple revenue layers. One recurring growth model.

Organisation contracts create the base. Usage, distribution and partner activity increase revenue as adoption grows.

Illustrative commercial targets — not forecasts

Organisation packages

\$2k–\$6k+ / year

Target: 2–4 new organisations per month
Once partner and distributor channels are active

24–48 organisations / year
≈ \$48k–\$288k annual contract value

Enterprise deployments

\$10k–\$25k+ / year

Initial target: 1 new enterprise every 2–3 months
→ Moving toward 1 per month

Initial 4–6 deployments / year
≈ \$40k–\$150k+ annual contract value

Credit top-ups & usage

+20–50%+

Potential uplift on base
organisation and enterprise
spend

Distributor licence sales

15–25% below retail

Approx. \$1.5k–\$5k per
organisation licence
\$7.5k–\$21k+ per enterprise licence

Direct creator revenue

\$50–\$200 / year

Per paying creator through
credits and premium features

Marketplace / partner transactions

10–20%

Potential platform take-rate
depending on partner model

Core model: organisation revenue + recurring credit usage + partner licence revenue

Additional layers: direct creators + marketplace / partner transactions

Stronger foundations.
Smarter growth.

Capital to move from validation to scale.

This raise is designed to strengthen the platform, expand the market and support repeatable institutional adoption.

RAISING

\$150,000

Target runway: 12–18 months

To accelerate Wistudi’s growth from early validation to larger institutional adoption and recurring revenue.

Investing in brighter learners.

Product & infrastructure

Strengthen the platform, expand AI-assisted creation, complete LTI readiness and support larger organisational deployments.

- ✓ Core platform development
- ✓ LTI / integrations
- ✓ AI-assisted creation
- ✓ Organisation / enterprise capability

Market expansion

Convert pilots and partnerships into repeatable institutional adoption across Southeast Asia and wider international markets.

- ✓ Institutional sales
- ✓ Distribution partnerships
- ✓ Regional expansion
- ✓ Partner onboarding

Customer success & delivery

Support schools, educators and partners with onboarding, implementation, training and ongoing product adoption.

- ✓ Onboarding and training
- ✓ Implementation support
- ✓ Customer success
- ✓ Pilot delivery

What this funding should unlock

More institutional customers

More active creators

More partner integrations

Recurring revenue growth

Thank you.

We'd welcome the opportunity to explore a pilot and strategic partnership together.

Next step

Let's continue the conversation.
